AWF Setup

General

- **Enabled**: Turns the DEXPRO Advanced Workflow app on or off. When disabled, no new workflow instances are started.

Trial Status

When the app runs in trial mode (no license activated), this section shows:

- **Status**: Current trial status (active / limit reached).
- **Workflow Runs Used**: Shows how many of the allowed trial workflow runs have already been used.

Activation

- **Activation Endpoint URL**: URL for the license check. Provided by DEXPRO Solutions GmbH.

Job Queue

- **Escalation Job Status**: Shows the current status of the escalation job queue entry (for example "Ready", "In Process", "Not Configured"). Click the status to open the related job queue entry.

Actions

- **Create Escalation Job**: Creates the recurring escalation job queue entry. Use this action if the entry was deleted or could not be created during installation.
- **Out of Office**: Opens the out-of-office entries where users can configure absence periods and substitute settings.
- **Check License**: Performs a manual license check against the activation endpoint.
- **Show Installation ID**: Shows the installation ID for this environment – required for license activation.
