

DEV TOOLS

No longer present in released versions

The developer/sandbox override actions previously documented here have been **removed from the shipping product**. They were internal testing tools located in the **DEV TOOLS** action group on the **AWF Setup** page and were only intended for testing the trial/license mechanisms in sandbox environments before release.

The following actions and the underlying mechanism **no longer exist** in released versions of the app:

- **Enter Trial Mode**
- **Activate License**
- **Reset Trial Counter**
- **Set Runs to 1 Remaining**
- The internal **Sandbox Override** (IsolatedStorage key `AWF-DevSandboxOverride`) that forced `IsSandboxEnvironment()` to return `false`

As originally noted, these DEV TOOLS had to be removed before release; that removal has been completed. There are no developer/sandbox override actions in the released product.

Revision #2
