

Module: Workflow Visualization

The workflow visualization shows an interactive graphical representation of the workflow template with all steps and connections.

Open the visualization

1. In the **AWF Workflow Template** → action "**Visualization**".
2. The visualization shows:
 - **Step nodes** with step code, step name, and step type (Normal / Error / Final)
 - **Connections** between steps (based on rule actions and default transitions)
 - **Color coding** by step type

Prediction

In the "**Prediction**" area you can select a test record:

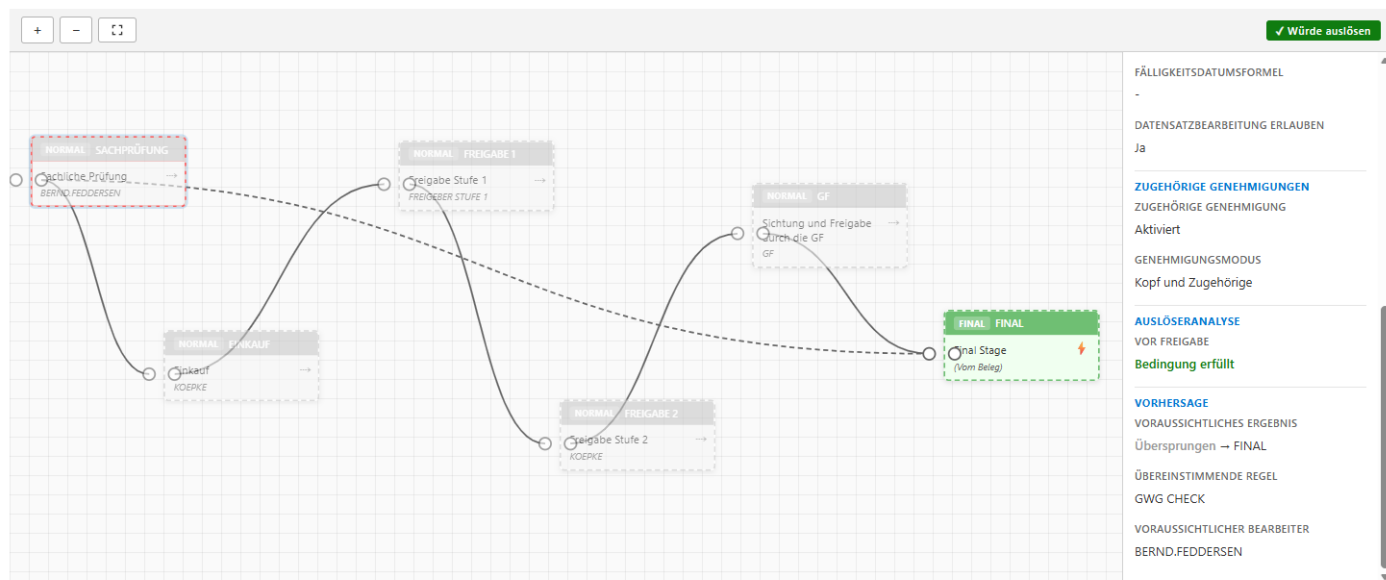

1. Click "**Test Record**" and select a specific record from the primary table.
2. The visualization then shows the expected path of the workflow:
 - Which steps would be auto-approved
 - Which steps would be skipped
 - Which steps require a manual approval
3. With "**Clear Selection**" you reset the prediction.

Save positions

The positions of the step nodes are saved automatically when moved (drag & drop). The next time the visualization is opened, the nodes are shown at the saved positions.
