

Step 0 – Check supported tables & events (must-know)

What are "AWF Supported Tables"?

In "**AWF Supported Tables**" you maintain which tables can be selected as the primary table at all.

Important:

- In the workflow template, only **supported tables** can be chosen as the primary table.
- Per supported table, the following is additionally maintained:
 - **Workflow Events** (which events may be used as triggers)

The screenshot shows the 'AWF Workflowvorlage' interface for 'ARTIKELPRÜFUNG'. A modal window titled 'AWF Unterstützte Tabellen' is open, displaying a list of supported tables. The table has two columns: 'Tabellen-ID' and 'Tabellenbezeichnung'. The first row is highlighted in blue.

Tabellen-ID ↑	Tabellenbezeichnung
→ 18	Debitor
23	Kreditor
27	Artikel
36	Verkaufskopf
38	Einkaufskopf
81	Fibu Buch.-Blattzeile
130	Eingehender Beleg
232	Fibu Buch.-Blattname
472	Aufgabenwarteschlangenposten
900	Montagekopf
5740	Umlagerungskopf

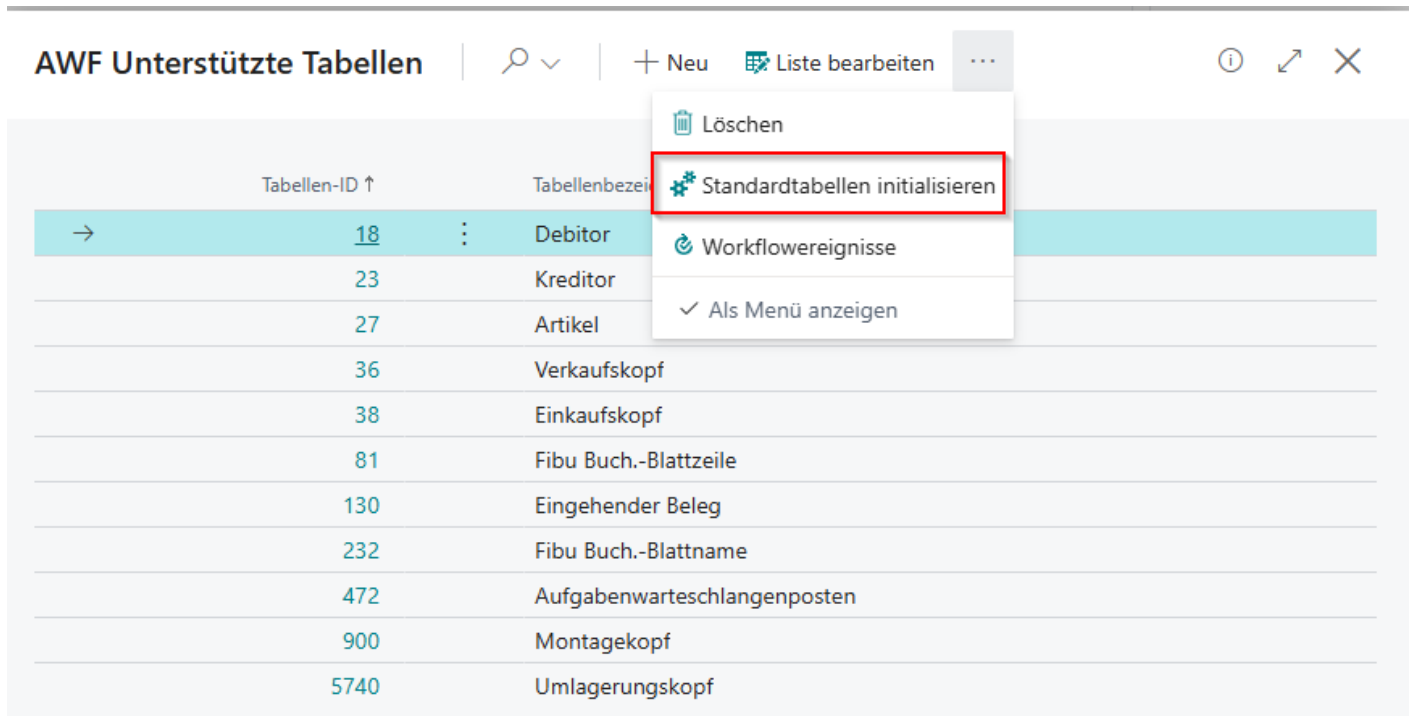

Initialize default tables

Since **AWF Supported Tables** is not directly searchable via Tell Me, open the page as follows:

1. Open **AWF Workflow Templates**.
2. Open a template (or create a new template).
3. In the "**Primary Table**" area, open the lookup of "**Primary Table ID**".

4. In the opened list **AWF Supported Tables** Action "**Initialize Default Tables**" run it (it is also initialized directly when opening).
5. Confirm.

This action initializes or repairs the default configuration.

The screenshot shows the 'AWF Unterstützte Tabellen' interface. The table has two columns: 'Tabellen-ID' and 'Tabellenbezeichnung'. The row with ID 18 (Debitor) is selected, and a context menu is open over it. The menu options are: 'Löschen', 'Standardtabellen initialisieren' (highlighted with a red box), 'Workflowereignisse', and 'Als Menü anzeigen'.

Tabellen-ID ↑	Tabellenbezeichnung
→ 18	Debitor
23	Kreditor
27	Artikel
36	Verkaufskopf
38	Einkaufskopf
81	Fibu Buch.-Blattzeile
130	Eingehender Beleg
232	Fibu Buch.-Blattname
472	Aufgabenwarteschlangenposten
900	Montagekopf
5740	Umlagerungskopf

View workflow events per table

On **AWF Supported Tables**:

- Action "**Workflow Events**": shows valid workflow events for the table

AWF Unterstützte Tabellen

+ Neu

Liste bearbeiten

Tabellen-ID ↑	Tabellenbezeichnung
