KoSIT Report

The **KoSIT Report** viewer (DXP eInv KoSIT Report Viewer) displays the official KoSIT *Pruefbericht* (validation report) for a generated e-invoice directly inside Business Central.

What is KoSIT?

KoSIT (Koordinierungsstelle fuer IT-Standards) is the German public-sector body responsible for the XRechnung standard. It publishes the official validator that checks whether an e-invoice conforms to XRechnung. When the app pre-validates a document, it runs it against this official validator; the validator returns a *Pruefbericht* - the authoritative validation report describing exactly which rules passed and which failed.

The viewer

The KoSIT report is produced as an HTML document. The viewer renders that HTML in a **WebPageViewer** control so you can read the official report - with all its formatting, rule references and pass/fail detail - without leaving Business Central.

{add screenshot of KoSIT Report here}

Action

- **Download Report** - saves the KoSIT report to a file so it can be archived or forwarded (for example as evidence of validation).

> You can open the KoSIT report for an entry from the Document Status page or from the Artifacts page via **Show KoSIT Report**.
