Queue Entry Fields

- **Entry No.:** Sequential number of the queue entry.
- **Record Title:** Title of the record to be archived.
- **Record Type:** The type of archive folder (e.g. Invoice, Credit Memo, Miscellaneous).
- **Status:** The current status of the entry:
 - **New** – Entry has been created but not yet processed.
 - **Processing** – Entry is currently being processed.
 - **Completed** – Archiving was successful.
 - **Error** – An error has occurred.
- **Error Notice:** Brief error description for failed archiving operations.
- **Last detailed error:** Full error message with details.
- **Retry count:** Number of retry attempts so far.
- **Reference Date:** The reference date under which the record is stored in the archive.
- **Attachment count not matching:** Indicates whether the number of local attachments matches the count in the archive.

Setting up the Job Queue Entry

Codeunit `70954898 DXP Freeze Queue Processing` must be set up as a Job Queue Entry to automatically process the queue entries. Recommended settings:

- **Object Type:** Codeunit
 - **Object ID:** 70954898
 - **Recurrence Interval:** 2 minutes (recommended)
-
