

Obtaining the DEXPRO modules

Detailed Information are [here](#).

OnPrem

For OnPrem installations, an runtime package with the required apps is provided upon request of a registered reseller / partner. These modules are added to the customer license by the partner and then imported into Microsoft Dynamics Business Central. It should be noted that the DEXPRO Core module forms the basis for all DEXPRO modules and must therefore be imported first.

Cloud

For cloud installations, you only need the Microsoft [AppSource](#). This is where the required DEXPRO modules are downloaded.
