

Logdateien löschen

Im Documents-Tomcat-Ordner liegt im Unterordner "**conf**" die Datei "**logging.properties**". Die Datei kann wie im folgenden Screenshot zu sehen um "**maxDays**"-Einträge erweitert werden.

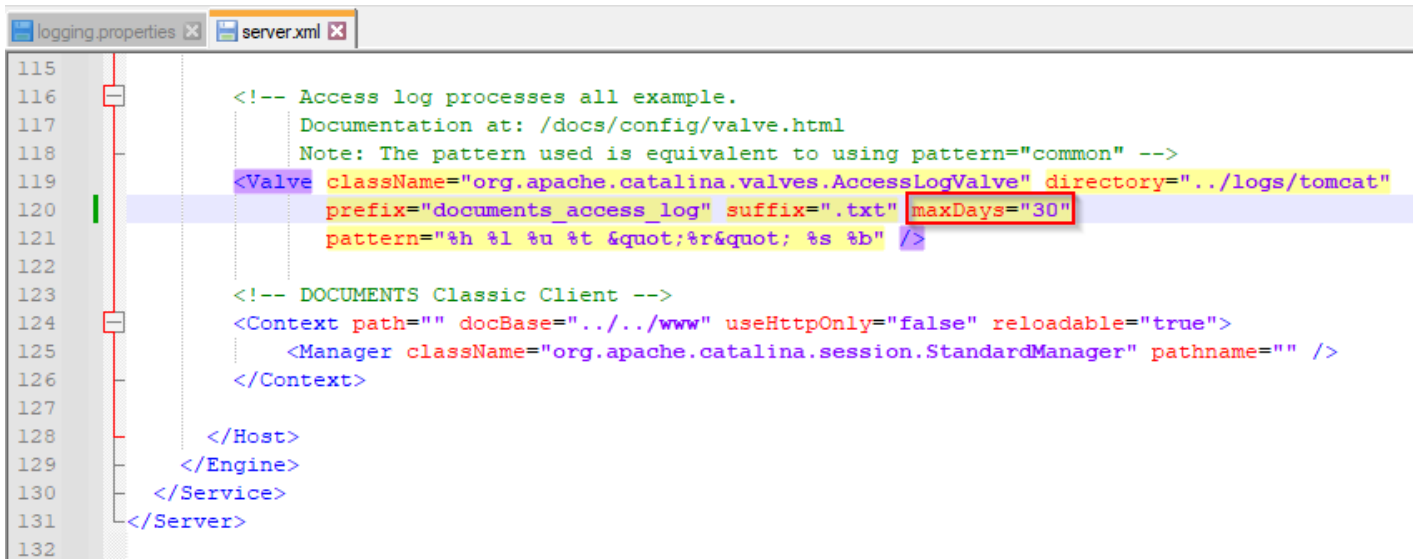

The screenshot shows a Notepad++ window titled "Documents5\tomcat8\conf\logging.properties - Notepad++ [Administrator]". The menu bar includes "Datei", "Bearbeiten", "Suchen", "Ansicht", "Codierung", "Sprache", "Einstellungen", "Werkzeuge", "Makros", "Ausführen", "Plugins", and "Fenster". The toolbar contains various icons for file operations and editing. The active tab is "logging.properties", and another tab "server.xml" is visible. The file content is as follows:

```
25 1catalina.org.apache.juli.AsyncFileHandler.level = FINE
26 1catalina.org.apache.juli.AsyncFileHandler.directory = ${catalina.base}/../logs/tomcat
27 1catalina.org.apache.juli.AsyncFileHandler.prefix = catalina.
28 1catalina.org.apache.juli.AsyncFileHandler.encoding = UTF-8
29 1catalina.org.apache.juli.AsyncFileHandler.maxDays = 30
30
31 2localhost.org.apache.juli.AsyncFileHandler.level = FINE
32 2localhost.org.apache.juli.AsyncFileHandler.directory = ${catalina.base}/../logs/tomcat
33 2localhost.org.apache.juli.AsyncFileHandler.prefix = localhost.
34 2localhost.org.apache.juli.AsyncFileHandler.encoding = UTF-8
35 2localhost.org.apache.juli.AsyncFileHandler.maxDays = 30
36
37 3manager.org.apache.juli.AsyncFileHandler.level = FINE
38 3manager.org.apache.juli.AsyncFileHandler.directory = ${catalina.base}/../logs/tomcat
39 3manager.org.apache.juli.AsyncFileHandler.prefix = manager.
40 3manager.org.apache.juli.AsyncFileHandler.encoding = UTF-8
41 3manager.org.apache.juli.AsyncFileHandler.maxDays = 30
42
43 4host-manager.org.apache.juli.AsyncFileHandler.level = FINE
44 4host-manager.org.apache.juli.AsyncFileHandler.directory = ${catalina.base}/../logs/tomcat
45 4host-manager.org.apache.juli.AsyncFileHandler.prefix = host-manager.
46 4host-manager.org.apache.juli.AsyncFileHandler.encoding = UTF-8
47 4host-manager.org.apache.juli.AsyncFileHandler.maxDays = 30
48
49 java.util.logging.ConsoleHandler.level = FINE
50 java.util.logging.ConsoleHandler.formatter = org.apache.juli.OneLineFormatter
51 java.util.logging.ConsoleHandler.encoding = UTF-8
```

In the original image, the lines for `maxDays = 30` on lines 29, 35, 41, and 47 are highlighted with a red rectangular box.

Im selben Ordner liegt die "**server.xml**", in der das "documents_access_log" ebenfalls um einen "maxDays"-Eintrag erweitert werden kann.

```
115
116 <!-- Access log processes all example.
117      Documentation at: /docs/config/valve.html
118      Note: The pattern used is equivalent to using pattern="common" -->
119 <Valve className="org.apache.catalina.valves.AccessLogValve" directory="../logs/tomcat"
120       prefix="documents_access_log" suffix=".txt" maxDays="30"
121       pattern="%h %l %u %t "%r" %s %b" />
122
123 <!-- DOCUMENTS Classic Client -->
124 <Context path="" docBase="../../www" useHttpOnly="false" reloadable="true">
125   <Manager className="org.apache.catalina.session.StandardManager" pathname="" />
126 </Context>
127
128 </Host>
129 </Engine>
130 </Service>
131 </Server>
132
```
