Alternative use of the SQUEEZE attachments

The following briefly explains how the attachments downloaded by SQUEEZE for BC can be used for a scenario that differs from the intended use.

After creating the purchase document from the validated SQUEEZE document, you have the option of accessing the attachments (assuming they have been downloaded in advance).

```
    // Set IsHandled to true and implement your code
    // Do not forget to deactivate "Transfer attachments to target document" in the Document Class Setup
    [EventSubscriber(ObjectType::Codeunit, Codeunit::"DXP Document Mgt.", 'OnBeforeTransferCoreAttachmentsToStandardDocument', '', false, false)]
    local procedure DXPDocMgtOnBeforeTransferCoreAttachmentsToStandardDocument(Document: Record "DXP Document"; var IsHandled: Boolean)
    begin
    IsHandled := true;
        HandleCoreAttachmentsAccordingToYourNeeds(Document, IsHandled);
    end;

    procedure HandleCoreAttachmentsAccordingToYourNeeds(Document: Record "DXP Document"; var IsHandled: Boolean)
    var
        CoreAttachments: Record "DXP Document Attachment";
        InStr: InStream;
    begin
        CoreAttachments.SetRange("Document No.", Document."No.");
        CoreAttachments.IsEmpty() then
       exit;
        CoreAttachments.FindSet();
        repeat
            CoreAttachments.Calcfields(Attachment);
            CoreAttachments.Attachment.CreateInStream(InStr);
            // Here you can handle the file stream according to your needs
         [...]
```

```
        until CoreAttachments.Next() = 0;
    end;
```
