

# Alternative use of the SQUEEZE attachments

The following briefly explains how the attachments downloaded by SQUEEZE for BC can be used for a scenario that differs from the intended use.

After creating the purchase document from the validated SQUEEZE document, you have the option of accessing the attachments ( assuming they have been downloaded in advance).

```
// Set IsHandled to true and implement your code
// Do not forget to deactivate "Transfer attachments to target document" in the Document
Class Setup
[ EventSubscriber( ObjectType::Codeunit, Codeunit::"DXP Document Mgt.",
' OnBeforeTransferCoreAttachmentsToStandardDocument', '', false, false)]
local procedure DXPDocMgtOnBeforeTransferCoreAttachmentsToStandardDocument( Document:
Record "DXP Document"; var IsHandled: Boolean)
begin
    IsHandled := true;
    HandleCoreAttachmentsAccordingToYourNeeds( Document, IsHandled);
end;

procedure HandleCoreAttachmentsAccordingToYourNeeds( Document: Record "DXP Document"; var
IsHandled: Boolean)
var
    CoreAttachments: Record "DXP Document Attachment";
    InStr: InStream;
begin
    CoreAttachments.SetRange( "Document No.", Document."No.");
    CoreAttachments.IsEmpty() then
        Exit;
    CoreAttachments.FindSet();
    repeat
        CoreAttachments.Calcfields( Attachment);
        CoreAttachments.Attachment.CreateInStream(InStr);
        // Here you can handle the file stream according to your needs
    [...]
```

```
until CoreAttachments.Next() = 0;  
end;
```
