

# Alternative use of the SQUEEZE attachments

The following briefly explains how the attachments downloaded by SQUEEZE for BC can be used for a scenario that differs from the intended use.

After creating the purchase document from the validated SQUEEZE document, you have the option of accessing the attachments ( assuming they have been downloaded in advance).

```
// Set IsHandled to true and implement your code
// Do not forget to deactivate "Transfer attachments to target document" in the Document
Class Setup
  [EventSubscriber(ObjectType::Codeunit, Codeunit::"DXP Document Mgt.",
'OnBeforeTransferCoreAttachmentsToStandardDocument', '', false, false)]
  local procedure DXPDocMgtOnBeforeTransferCoreAttachmentsToStandardDocument(Document:
Record "DXP Document"; var IsHandled: Boolean)
  begin
    IsHandled := true;
    HandleCoreAttachmentsAccordingToYourNeeds(Document, IsHandled);
  end;

  procedure HandleCoreAttachmentsAccordingToYourNeeds(Document: Record "DXP Document"; var
IsHandled: Boolean)
  var
    CoreAttachments: Record "DXP Document Attachment";
    InStr: InStream;
  begin
    CoreAttachments.SetRange("Document No.", Document."No.");
    CoreAttachments.IsEmpty() then
    IsHandled := true;
    CoreAttachments.FindSet();
    repeat
      CoreAttachments.CalcFields(Attachment);
      CoreAttachments.Attachment.CreateInStream(InStr);
      // Here you can handle the file stream according to your needs
    until CoreAttachments.Next() = 0;
```

end;
