

Custom Field Mapping

You may always want to write certain information in certain fields in your process that deviates from the standard field assignment. In the following example, the service date recognized by Squeeze is always written in the “Booking date” field - in addition to the standard behaviour. The service date therefore remains filled.

Open the field assignment in the document class setup:

Then open the “User-defined field assignment”:

Then make the desired assignment:

🔍 | + New | Edit List | Delete | Replace mapping in company | More options

Document Class Invoice / Credit Memo

Type ↑	Id ↑	Name	Caption	App Field Id ↑	App Field Name	App Field Caption	Assign to Field No.	Assign to Field Caption
→ Header	7	DocumentDate	Belegdatum	23	Document Date	Document Date	20	Posting Date
