

SQUEEZE Queue

The SQUEEZE Queue provides a real-time overview of the processing status of all documents in the SQUEEZE pipeline of the connected tenant.

Overview

The queue displays the number of documents at each processing step:

- **Error:** Documents where an error has occurred (highlighted in red). The drilldown opens the SQUEEZE web interface.
- **Init Process:** Documents in the initial processing step.
- **Image Optimization:** Documents currently being pre-processed for image quality.
- **Barcode Extraction:** Documents where barcodes are being read.
- **OCR:** Documents where text recognition is being performed.
- **Classification:** Documents being assigned to a document class.
- **Extraction:** Documents where data extraction (document reading) is being performed.
- **Export:** Documents ready to be fetched by Business Central.
- **Backup:** Already processed documents.

Non-empty steps are displayed in bold. The view refreshes automatically every 5 seconds.

Actions

- **Download Documents now:** Triggers a manual document download from SQUEEZE.
- **Upload document:** Allows uploading a document to the SQUEEZE system.

The queue is accessible from the SQUEEZE Document Overview via the **Queue** action.
