

# SQUEEZE

The SQUEEZE page must also be prepared for fetching documents from Microsoft Dynamics Business Central.

Each document class that is to be retrieved from Microsoft Dynamics Business Central requires its own export interface of the type "Pull". In addition, the document class ID, the export interface ID and the master data table ID must be stored in Microsoft Dynamics Business Central in the setup for the SQUEEZE [document classes](#).

If the latest SQUEEZE for BC version is not used, the following batch class properties must be set in the SQUEEZE client:

The screenshot shows the configuration page for 'Eingangsrechnungen' in the SQUEEZE client. The page is titled 'Stapelklassen > Eingangsrechnungen' and has three tabs: 'Allgemein', 'Klassifikationen', and 'Eigenschaften'. The 'Eigenschaften' tab is active. Below the tabs is a table with two columns: 'Eigenschaft' and 'Wert'. The table contains two rows of properties.

Eigenschaft	Wert
ExportAfterExtraction	true
IgnoreMandatoryFieldCheckForExport	true
