Upload Documents

SQUEEZE for BC offers the ability to send documents directly from Business Central to the connected SQUEEZE system.

Upload Documents via the Document Overview

In the SQUEEZE Document Overview, the **Upload documents** action is available. When invoked, you will be prompted to select the document class. The upload page then opens.

Squeeze File Upload

On the upload page, files can be dropped into the drop zone via **drag & drop**. Multiple files can be dropped simultaneously.

The **Upload files** action uploads all dropped files to the SQUEEZE tenant. After a successful upload, each file is marked with a checkmark.

When closing the page, it checks whether all dropped files have been uploaded. If at least one file was not uploaded, a corresponding warning is displayed.
